

Coil Handling

Model 281 – Double Rim Coil Tong/Grab

Automatic Double Rim Coil Grabs are designed to handle light gauge or highly finished coils when in the eye vertical position. The grab grips both walls of the coil when in the eye vertical position to minimize gripping pressure. Coil grabs are custom designed per application.

PRODUCT FEATURES:

- Auto-Latch mechanism for attach and release operation of tong. (Hoist line must be slack to engage and disengage Auto-Latch mechanism).
- All pivot points furnished with hardened steel bushings/pins and lubrication fittings.
- Handles a wide range of coil sizes and capacities.
- Grip jaws conform to coil sizes.

PRODUCT OPTIONS:

- Motorized grab.
- Replaceable facing on pads for coil protection.
