

Ingot/Slab Handling

Ingot/Slab Tong

This screw type grab allows for handling of a wide range of ingots. Additional grip force is applied by the wedge action of the points when the load is lifted. This unit is designed to grip an ingot in the vertical position and lay it down to the horizontal position. Grabs are custom designed per application.

PRODUCT FEATURES:

- Screw drive for a wide range of ingot widths.
- Bronze drive nuts for long life and smooth operation.
- Wedge action applies grip force.
- Low headroom design.
- Close tolerance machined slide beam and grip arms.
- Heavy duty worm gear reducer.
- Designed for ease of maintenance.
- Heavy duty drive guards.
- AC power.

PRODUCT OPTIONS:

- Powered rotation with or without stops.
- Integral weighing system.
- Maximum open/minimum closed limit switches.
- Swivel rest arms for proper rollover clearance.
- Heavy duty function indicator lights.
- Wedge locks.
- DC power.
- Electrical reversing motor controls.
